

Daily Puzzle #3 – Nonogram

Your aim is to turn the whole grid into black and white squares to reveal a secret answer. Beside each row of the grid are listed the lengths of the runs of black squares on that row. Above each column are listed the lengths of the runs of black squares in that column.

So, if you see '5 4', that tells you that there will be a run of exactly 5 black squares, followed by one or more white squares, then a run of exactly 4 black squares. There can be additional white squares before or after the sequence.

Clue: Bring the answer into full view. Make the unknown known.
